

ABSTRACT

The object of the present application is a dye carrier composition containing oxidative and/or nonoxidative dyes and

5

- (a) 6.1 to 20 weight percent of at least one fatty alcohol with 14 to 20 carbon atoms,
- (b) 6.1 to 20 weight percent of at least one alkanolamide,
- (c) 0.1 to 15 weight percent of at least one fatty alcohol alkoxylate or fatty acid alkoxylate and
- (d) 0.1 to 15 weight percent of at least one anionic surfactant,

10

wherein the weight ratio of fatty alcohol (a) to alkanolamide (b) is equal to 0.5:2 to 2:0.5.
Another object is the use of the afore-said combination of components (a) to (d) for producing a nacreous luster effect in dye carrier compositions and colorants for keratin fibers.
